DEVELOPMENT OF NATIONAL AND INTERSTATE STANDARDS FOR THE RAILWAY INDUSTRY

In support of domestic producers 44 national standards and 4 interstate standards of transport sector were developed in the 2014-2015

Development of the following interstate GOST standards will be completed in 2016:

1. GOST "Passenger train of locomotive traction with air suspension system and body tilt. General specifications";
2. GOST "Railways. General specifications";
3. GOST "Railway transport. Basic concepts. Terms and Definitions".

CREATION OF TESTING LABORATORIES

2 labs were created in order to verify railway technology compliance and products in accordance with the technical regulations of Customs Union

Laboratory "Test of road and artificial constructions"

Laboratory "Ecological safety and assessment of workplace"

Accreditation of testing center based on KazATC is planned in current year

Dynamic tests of rolling stock and its impact on the road, turnouts and ISSO.

Track, stationary, train and brake tests of rolling stock

Tests of rail transport software

Tests of railway automatic equipment and communication
